ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time:

August 27, 2003/12:30

Site Contact(s):

Alec Cameron

Phone:

(303) 966-4787

Regulatory Contact: James Hindman

Phone:

(303) 692-3345

Agency:

Colorado Department of Public Health and Environment

Purpose of Contact: RCRA Closure of Valve Vaults 5 and 6

Discussion

The purpose of the meeting was to request permission to Demolish Valve Vaults 5 and 6 prior to the formal RCRA closure report.

History

Process equipment internal to Valve Vaults 5 and 6 (piping, valves, sump, sump pump, and liner) was removed and disposed of as Low Level Mixed Waste. The valve vaults and process waste lines were washed with high pressure soap and water per the approved Closure Description Document (CDD).

Rinseate of the valve vaults and process waste lines met the criteria specified in the approved CDD and therefore Valve Vaults 5 and 6 meet clean closure under RCRA (see attached data). The formal report, signed by a Professional Engineer, will be submitted at a later date when the remainder of the 800 area is completed, and incorporated into the closure report.

The valve vaults have been characterized clean for both radiological and beryllium contamination and are ready to be demolished through the normal site processes.

Agreement

Mr. Hindman agreed with the following:

('EX-16-01

- Valve Vaults 5 and 6 are RCRA closed and may be demolished.
- Kaiser Hill will submit the final closure report for Valve Vaults 5 and 6, signed by a Professional Engineer, at a later date along with the closure report for the remainder of the 800 area.
